

Northern Rail Industry Leaders

Delivering British Railways using Northern Skills Innovation and Talent.

A key aim of NRIL is to feed into Transport for the North's Strategic Transport Plan and therefore one of our first objectives is to develop a **'Rail Supply Chain in the North' Report** to complement the TfN strategies. This is likely to focus on the potential to create an economic, skills and capability legacy in the north through the proposed investment in the rail network.

Please find below a series of Policy Workshops that will be used to feed into the Report. All workshops can also be found at www.northernrailleaders.com/events

Policy Workshops
